LEARN MORE

Savor™ M1100™
Bluetooth® Headset
TAKE A GOOD LOOK

**CALL BUTTON**
- Take a call or end it (1 tap)
- Redial (2 taps)
- Reconnect lost connection (1 tap)
- Activate pairing after initial set up (press until LED flashes blue/red)
- Transfer a call to/from headset (1-second press during call)

**POWER SWITCH**
- On (slide to reveal black)
- Off (slide to reveal red)

**VOICE RECOGNITION BUTTON**
- Voice Recognition (VR) commands (Tap VR button, say a command within 10 seconds. See Voice Commands for commands list.)
- Initiate phone’s voice-dialing (2-taps then tone heard)

**MICRO USB CHARGING PORT**
- With AC charger:
  - 20 minutes (1 hour talk time)
  - Less than 2 hours (full charge)
- Best performance when fully charged

**VOLUME/MUTE BUTTON**
- Volume up/down (1 tap per level change)
- Mute: on/off (1-second press)

**LED**
- Charging (Solid red. No light when fully charged)
- Low battery (2 red flashes, 2 tones and voice alert)
- Critically low (3 red flashes, 3 tones and voice alert)

Be safe! Please read the safety guide before using your new headset.
“Pairing” connects your headset to your phone. “Multipoint” technology lets you use this headset with two phones.

1. READY
Activate the Bluetooth feature on your phone, then use the phone’s settings to add/search/discover new Bluetooth devices.

iPhone:
Settings > General > Bluetooth > On
(starts the search for devices)

BlackBerry® smartphone:
Settings/options > Bluetooth: On > Search for devices

VIDEO TUTORIAL IN USA:
www.plantronics.com/pairing

2. SET
First Time:
With headset turned off, activate Bluetooth pairing mode by sliding Power switch on. The LED flashes blue/red to indicate pairing mode.

Pairing New Phone/Reconnecting Original:
Turn on the headset then press and hold the Call button until the LED flashes blue/red.

3. CONNECT
Select “PLT_M1100” from the list of Bluetooth devices shown on your phone.
If phone asks for a passcode, enter four zeros (0000). You may see **** on screen.
Some phones also ask to confirm headset connection after pairing.
Headset LED will stop flashing blue/red once your phone and headset are successfully paired/connected.
The loop of the gel eartip tucks into the back curve of your ear for a stable fit.

Try on the headset. The eartip is positioned to suit most people, but you may want to rotate it to best fit your left or right ear.

The gel eartip and speaker click into matching grooves so the eartip doesn’t move out of place during use.

The loop on the gel eartip should point away from the headset. (Do not rotate the eartip too far.)
MIX AND MATCH FOR BEST FIT

If the gel eartip feels loose or tight in your ear, then change it. To replace the medium gel eartip for small or large, pull the loop of the gel eartip to remove it. (Don't pull on the speaker base and stem.)

Using your thumb, tuck the bottom of the eartip over the speaker and pull the loop of the eartip over the speaker. (Don't push the speaker through the gel eartip.)

For best voice pickup, always check that the headset points towards the corner of your mouth.

Optional earloop shown

VIDEO TUTORIAL:

Plantronics M1100 supports multipoint technology, which allows you to use one headset with two different Bluetooth mobile phones.

To pair your headset to a second phone, see “Connect to Your Phone.”

**How to Initiate a Call**

When multipoint is in use, the headset controls, initiates or redials a call from the phone that last made an outgoing call.

To use the second paired phone instead, make the call using the controls on that phone. The second phone activates its link with the headset.

**NOTE:** The headset cannot place a current call on hold while answering a call from the second phone.

**How to Answer a Call While Talking on the Other Paired Phone**

To answer a second call on the other phone, the current call must be terminated or transferred back to the first phone. To transfer the call, see “Take a Good Look.”

If you choose not to answer, the second call will go to voice mail.

**Answering an incoming call from the second phone, while already on another call:**

1. Before answering the second call, end the first call by tapping the Call button.
2. Answer the second call by tapping the Call button again.

**TIP** To avoid issues with multipoint, use the Call button on the headset rather than your phone controls.
This headset whispers various status alerts when you power on/off, run low on talk time, or lose/reconnect the Bluetooth connection to your phone.

</table>
You can give your headset a command, and it will whisper the answer or do what you say.

If your command is not recognized by the headset, you may hear a helpful prompt like “Always remember the “What Can I Say?” command for a list of active commands”.

**Know How to Control the Headset:**
First tap the VR Button then say:
- What Can I Say?
- Pair Mode
- Am I Connected?
- Check Battery
- Redial
- Cancel
- Call Information (USA only; dials Bing 411™)
- Call Vocalyst™ (USA only)
- Answer (no need to tap VR first)
- Ignore (no need to tap VR first)
Pair/Connect Just Once:
Pairing is a one-time process unless your phone loses the connection or you want to pair a new phone.

Know How to Reconnect:
Your headset tries to reconnect a lost connection. If it can't, then tap the Call button once or manually reconnect via the phone’s Bluetooth device menu.

Continue a Call Without the Headset:
If you need to continue a call without using your headset, just press the Call button for 1 second and the call transfers back to your phone. You will hear a tone to confirm the transfer.

Listen To Music But Don’t Miss a Call:
This headset supports Bluetooth A2DP audio streaming to let you hear music, internet radio, podcasts and even turn-by-turn directions from your A2DP-enabled phone. Use your phone to start the music or audio and it will automatically transfer to your headset. If your phone rings, your streaming audio will mute to allow you to answer or ignore the incoming call then automatically resume playback. Audio will also pause when you use the headset voice commands but will only resume playing if you did not make an outgoing call.

Stay Near Your Phone:
Bluetooth has a working “range” of up to 33 feet between the phone and headset before audio degrades and the connection is lost.

Sound Your Best:
For best voice pickup, always check that the headset points towards the corner of your mouth.
