Quick Start Guide

Pair Mobile Phone and Call

1. Power on your headset then choose:
   - Tap the Voice button and say "Pair mode," or
   - Press and hold the Call button until you hear “Pairing.” While the headset LEDs are flashing red and blue, activate Bluetooth on your phone and set it to search for new devices.
   - While the headset LEDs are flashing red and blue, activate Bluetooth® on your phone and set it to search for new devices.
2. Select "Pair Legend." (Available only with your mobile phone)
3. If prompted by your mobile phone for a passcode enter 0000. Once successfully paired, LEDs stop flashing red and blue and you hear “pairing successful.” Some phones may prompt you to allow access to contacts to enable caller name announcement.
4. Make a test call from your mobile phone.
5. End the call by pressing the call button. The call does not end when you remove your headset.

Pair another phone

After pairing your headset to your phone you may want to pair another or new phone:

1. Power on your headset then choose:
   - Tap the Voice button and say "Pair mode," or
   - Press and hold the Call button until you hear “Pairing.”
2. While the headset LEDs are flashing red and blue, activate Bluetooth® on your phone and set it to search for new devices.
3. Select “Pair Legend.”
4. Once successfully paired, LEDs stop flashing red and blue and you hear “pairing successful.”

To Re-pair your Bluetooth USB adapter

In the event that your headset and Bluetooth USB adapter become unpaired do the following:

1. Power headset on.
2. Remove the USB adapter.
3. Power on your headset then choose:
   - Tap the Voice button and say "Pair mode," or
   - Press and hold the Call button until you hear “Pairing.”
4. Insert Bluetooth USB adapter directly into your PC USB port. Once successfully paired, LEDs stop flashing red and blue and you hear “PC connected.”

Charge and Fit Headset

Three ways to charge your headset

Your new headset has enough power to pair and make a few calls before charging is needed, though you may charge any time.

1. Align snap-fit magnetic areas of headset and charging device.
2. Attach charging device to USB wall charger or laptop for 90 minutes. LEDs turn off once fully charged.

USB cable to PC or USB wall charger

Charge case to PC or USB wall charger

Fit your headset

Replace the eartip for a better fit.
1. Push in eartip and rotate to the left to unlock it.
2. Replace the eartip for a better fit.
3. Push in eartip and rotate to the right to lock it into place.

To wear the headset on your other ear, rotate the boom upwards then twist it around so eartip is on other side before lowering boom.

Use sensors

Smart Sensors react when you put on or take off your headset.

Putting on your headset:

1. Answer an incoming call
2. Resume streaming audio
3. Take off your headset
4. Pause streaming audio
5. Lock the Call button to prevent accidental calls

Try voice commands

Tap the Voice button and say a command. For example, “What can I say?” tells you the full list of voice commands supported by your headset.

Voice dial (mobile phone feature)

• Tap the Call button and say “Dial (number).”
• Press and hold the Call button until you hear “Dialing.”

Voice dial (mobile phone feature)

• Tap the Call button and say “Voice.”
• Press and hold the Call button until you hear “Voice.”

Use and Reset Smart Sensors

Smart Sensors react when you put on or take off your headset.

Poster sensors

You may need to reset the sensors if they are not working as expected.

Wearing the headset, tap the Call button to test sensors:
1. Tap voice alert sensors are working
2. A tone means sensors need to be reset
3. To reset the sensors, charge your headset and place as a flat non-conductive surface for more than 10 seconds.
