Installation of Plantronics Hub for Windows

Plantronics Hub

Plantronics Hub for Windows/Mac is a stand-alone application providing call control, settings management, update and battery level notifications and mute alerts.

Windows

The Plantronics Hub for Windows application can be launched from the Windows Start Menu or from the Plantronics icon in the bottom right notification area (user initiated modification required)¹. The Plantronics Hub application will run in the background at start up and uses minimal system resources.

Mac

Once the Plantronics Hub for Mac application is installed, a Plantronics headset icon should appear in the upper right side menu.

Permissions

Administrative rights are required to install this application.

With Plantronics Hub for Windows, you may be prompted by Windows UAC to allow the installation of this software. Select yes to continue the installation.

Windows Hardware Requirements

CPU

Core 2 Duo or Athlon X2 at 2.4 GHz

Memory

Between 20-50mb of Private Working Set

¹ Select Customize Notifications from the Windows Control Panel and modify the Plantronics software to “show icon and notifications”

Hard drive

Requires approximately 70mb

Supported Platforms for Mac

MacBook Pro

MacBook Air

iMac

Mac Mini

Mac Pro

Bandwidth Requirements

The bandwidth requirements vary based upon the type of update that is being downloaded from Plantronics Manager. Firmware updates are relatively small and require minimal bandwidth for the download. The Plantronics Hub application is larger and consumes more bandwidth than firmware updates.

Software Prerequisites

Plantronics Hub for Windows requires Microsoft .net 4.0 and Windows Installer 4.5. Information on Windows Installer 4.5 can be found [here](#).

Plantronics Hub for Mac does not have any prerequisites.

Operating Systems

Supported

Windows Vista SP2, Windows 7, Windows 8.x (Desktop Mode), Windows 10 (Desktop Mode)

Mac OS versions Yosemite (10.10), El Capitan (10.11) and Sierra (10.12).

Virtualized Environments (VDI)

Plantronics Hub now supports certain VDI configurations, these are:

- Microsoft Skype for Business running Windows operating system and in Citrix XenDesktop environment
- Certain versions of Cisco Jabber VXME running on Windows operating system and in Citrix XenDesktop environment
- Certain models of HP and Dell Wyse thin terminals as well as normal PCs/laptops re-purposed for VDI
- Support is available regardless of Plantronics Hub being installed or not

For further information on VDI support please contact Plantronics by visiting www.plantronics.com/contactsupport.

Browser

Plantronics Hub does not have any dependencies on the browser and therefore has no browser requirements.

Network Requirements

Ports & Protocols

Plantronics Hub for Windows uses SSL, port 443 to provide notification and download of updates. If this port is not open, you will not be able to receive notifications of available updates.

Softphone and media player compatibility

Plantronics Hub for Windows

- Avaya Aura Agent Desktop v7.0 31.1.13.69
- Avaya Communicator V.2.1.4.84
- Avaya Communicator for Microsoft Lync v6.4.0.5.39

Upgrading from Previous Releases

If you are upgrading from Spokes 2.x, you must uninstall Spokes 2.x before installing Plantronics Hub 3.x.

Upgrading from Plantronics Hub 3.x to the latest version of Plantronics Hub can be done in place. No uninstall is required.

New Installations of Plantronics Hub for Windows

Plantronics Hub for Windows can be installed manually using the Plantronics Hub install file.

New Install of Plantronics Hub for Mac

Plantronics Hub for Mac can be installed manually using the Plantronics Hub dmg file.

Uninstalling Plantronics Hub for Windows

Uninstalling Plantronics Hub for Windows can be done manually from the Windows Control Panel. Device settings that were customized will remain intact as those settings are saved to the device.

Possible Files Remaining on System When Using the Plantronics Hub exe

After cancelling an install or uninstalling Plantronics Hub for Windows using.exe, some files may remain and require manual removal. Use the following search parameters to locate the Plantronics files that can safely be removed:

- OldMHUUninstaller_*.log
- Plantronics_Hub_Software_*.log

Below are examples of the files that you may find on your system.

EXE Remnants

Name
C:\Users\Tester\AppData\Local\Temp\

Plantronics_Hub_Software_20170126192003_0_PLTHUB_x64.log

Possible Files Remaining on System When Using the Plantronics Hub MSI's

After cancelling an install or uninstalling Plantronics Hub for Windows with 32/64 bit MSI, some files may remain and require manual removal. Below are examples of the files that you may find on your system.

MSI Remnants

Name
C:\Program Files (x86)\Plantronics\
C:\Program Files (x86)\Plantronics\Spokes3G\

C:\Users\Tester\AppData\Local\Plantronics\

C:\Users\Tester\AppData\Local\Plantronics\logs\

Plantronics Created Registry Entry

Plantronics also creates a key called System ID in:

HKEY_LOCAL_MACHINE\SOFTWARE\PLANTRONICS

This key is used to uniquely identify the Plantronics Hub user and is not deleted when Plantronics Hub for Windows is uninstalled. This key prevents a user from being duplicated in the Plantronics Manager Pro database if there is an uninstall and then re-install of Plantronics Hub. Removing this registry key and reinstalling Hub will cause this user to be created a second time in the Plantronics Manager Pro database and it is therefore recommended that the registry key NOT be removed by Hub users who are part of an enterprise tenant using Plantronics Manager Pro. This key is not collected for consumer tenants.

For more details, please see the Plantronics Privacy Policy. <http://www.plantronics.com/software-privacy-data-collection>

Uninstalling Plantronics Hub for Mac

Drag the Plantronics Hub icon from the Applications folder to the trash.

Possible Files Remaining on System Following an Uninstall

Additional folders, sub-folders and files may require manual removal. Navigate to the following location to remove them:

Name:	Full path: %@
Plantronics	/Users/>user</Library/Application Support/Plantronics
Plantronics Hub	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub
logs	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics/Logs
Spokes.log.txt	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics/Logs/Spokes.log.txt
Plantronics	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics
NotificationsSchedule.json	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics/NotificationsSchedule.json
SpokesUser.config	/Users/>user<a/Library/Application Support/Plantronics/Plantronics Hub/Plantronics/SpokesUser.config
updateData.json	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics/updateData.json
Plantronics-Inc..Plantronics-Hub.plist	/Users/>user</Library/Preferences/Plantronics-Inc..Plantronics-Hub.plist
FWUpgrade	/Users/>user</Library/Application Support/Plantronics/Plantronics Hub/Plantronics/FWUpgrade
Spokes.config	/Users/<user>/Library/Application Support/Plantronics/Plantronics Hub/Plantronics/Spokes.config

Possible Files Remaining on System When Plantronics Hub for Mac Is Cancelled

Cancelling during an installation of Plantronics Hub for Mac may leave some folders and a “Plantronics Software” disk image still mounted.

Manually eject the Plantronics Software disk image by dragging it to the trash.
