

# Amp up your PlayStation® action

**Win faster.** When games sound realistic and your commands and calls are clearly heard, you'll win faster. Signature Plantronics audio in the Plantronics GameCom P60 headset enhances your PlayStation® entertainment and the premium RIG audio amp gives you control over EQ settings and the mix of game sound with chat or mobile music.

## FEATURES

- Lightweight and flexible, the headset is comfortable for hours and the 40mm stereo speakers deliver Plantronics signature audio: rich, resonant stereo with brilliant clarity and powerful bass
- Flexible, noise-canceling microphone reduces background noise and the amp lets you toggle mic feed between game chat and mobile calls
- The amp lets you mix the balance of game action to either chat audio, mobile music, or calls without looking away from the screen
- Tap one of three EQ settings on the amp to choose between Pure for improved voice clarity, Intensify to boost mid-range audio, and Seismic for more excitement without bass distortion
- Convenient connections with cables long enough to reach from your Playstation to the couch
