**Technology Legend**

**A2DP**

A Bluetooth profile that allows high quality audio content to be streamed from one device to another. Listen to streaming media, music and navigation through your headset.

**Active Noise Canceling (ANC)**

Technology that reverses surrounding sound waves to cancel low frequency noise in order to isolate and minimize ambient noise the user can hear.

**Adaptive Power**

Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximize density.

**Dynamic EQ**

Optimizes voice quality on calls and automatically adjusts EQ settings when listening to music or for multi-media playback.

**Hi-fi Stereo**

Full-range dual channel audio playback capable of frequencies from 20 to over 20,000Hz.

**Immersive Audio**

Specially designed ear cushions and headband reduce background noise and allow you to focus.

**Smart Sensor Technology**

Built-in sensors deliver automatic functionality like answering a call by placing the headset on and automatically transferring calls between smartphone and headset.

**SoundGuard**

Acoustic limiting for protection against sounds above 118 dBA per Telecom Industry Standards.

**SoundGuard DIGITAL**

All the benefits of SoundGuard, plus anti-startle protection which detects sudden increase in sound and eliminates the increase, and Time Weighted Average (TWA) control which prevents average daily sound exposure from exceeding 85 dBA.

**USB-C**

For connection to devices using the latest USB 3.1 standard with a smaller plug and allowing connection in either direction.

**Wideband**

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
