Technology Legend

Adaptive Power

Automatically downshifts to low power when the wireless headset is close to the base to save battery life and maximize density.

Narrowband

Frequency range of 300 Hz to 3.4 KHz found within PSTN and mobile voice networks.

Quick Disconnect

Lets user conveniently unplug their corded headset so they can walk away from their phone without removing their headset.

SoundGuard

Acoustic limiting for protection against sounds above 118 dBA.

Wideband

Frequency range to 6,800 Hz. Meets TIA-920 standard for genuine wideband response found within IP telephone voice sound.

SoundGuard DIGITAL

All the benefits of SoundGuard, plus anti-startle protection which detects and eliminates sudden increase in sound, and measures and controls sound to prevent average daily sound exposure from exceeding 80 dBA or 85 dBA Time Weighted Average (TWA).
