World Leader in Communications Headsets

PRELIMINARY PRODUCT INFORMATION

Turn Your PC Into An Internet Chat System.

So you have a great desktop PC. You have a pair of awesome speakers. You're all connected to the Internet. You need only one thing to turn your computer into an Internet chat system—a microphone! Introducing the new Plantronics .Audio™10, the best desktop microphone for your PC.

The Plantronics .Audio 10 analog microphone uses state-of-the-art noise-canceling technology from Plantronics to capture and transmit your voice as accurately as possible. So when you're in that Internet chat room or on that video conference, your words will be clear as a bell. The .Audio 10 analog microphone is also great for Internet phone calls and voice-enabled multiplayer games.

The new Plantronics .Audio 10 desktop PC microphone. Get it today for microphone quality that's right on the dot.
